Why Worry?

Worry is the cause of many of the world's problems. Don't ruin today by worrying about yesterday's problems. Worry does not empty tomorrow of its sorrows, but it empties today of its peace. A day of worrying is more exhausting than a day of hard work. Nothing wastes more energy than worrying. It's a total waste of time. Its useless. Worry raises your blood pressure, hardens your arteries, causes depression, damages your health, increases your stress levels and makes you feel miserable. It gives you headaches and sleepless nights and robs you of peace of mind. There is no pill , no seminar, book or CD to stop you worrying.

The answer is to put God in control of your life. Trust Him. God is in charge and God understands. Let tomorrow to God. Live one day at a time. Don't open your umbrella until it starts raining and don't t cross bridges until you reach them.

Hand over everything to God, yourself, your problems, plans and health. Surrender and abandon yourself to God. Surrender your family to God. Your future is in God's hands and in God's hands your are in safe hands. Trust God and all will be well.

A thought for Mother's Day." - This Mothering Sunday we pray for all mothers, mothers across the developing world who strive to create a better future for their children. Mothers like those in Kenya, Somalia, South Sudan and Ethiopia where a hunger crisis still grips the land. Mothers there are doing without food so their children can have a little more to eat. www.trocaire.org
